

WHY CHOOSE DHG?

DHG combines insurance industry experience with data privacy technical insight to tailor compliance programs that fit your business objectives and meet regulatory scrutiny.

protecting consumer personal information

Insurance companies routinely handle highly sensitive consumer personal information when providing services to customers. As consumer concern grows, comprehensive legislation is being passed to address the privacy of consumer data. The Global Data Protection Regulation (GDPR) in the European Union and California Consumer Privacy Act (CCPA) are landmark regulations designed to give consumers transparency regarding how companies use personal data and limit data sharing by these organizations. Insurance companies must consider their compliance obligations.

WHAT WE DO

DHG provides risk-based assessment and advisory services designed to help insurance companies understand the nature of the data that is transmitted and processed within their IT environment. We advise insurance companies on processes and procedures to achieve compliance with the transparency and consumer rights requirements of privacy regulations.

Our services address many aspects of compliance requirements, including:

- + Data Discovery and Processing Inventories
- + Breach Notification Advisory
- + Compliance Gap Analysis
- + IT Infrastructure Assessments
- + Policy and Procedure Enhancement

INDUSTRY & TECHNICAL EXPERIENCE

DHG Insurance and DHG IT Advisory combine to maintain a forward thinking and credentialed security and privacy team with significant experience assessing and advising on cybersecurity and data privacy requirements within the industry. We serve as strategic advisors to our clients and are committed to helping address complex data privacy issues. Our experience with current and emerging privacy frameworks, third-party risk management processes and complex IT environments establishes our team as a trusted advisor to clients.

As the privacy landscape continues to evolve, and more stringent regulations are passed, we help insurance companies anticipate potential compliance issues and prioritize resources to meet data privacy objectives.
