cost segregation studies

DHG, one of the nation's top 20 accounting firms, has dedicated professionals working exclusively with dealerships across the country. Providing our clients with industry relevance and thought leadership, DHG Dealerships advises on best practices to help maximize efficiencies, decrease costs and manage risk. We provide an objective and industry based view backed by considerable experience and resourcefulness.

What We Do

Through engineer-based studies and reliable technology, our cost segregation services help your dealership accomplish the following:

- Evaluate building assets that can be depreciated at an accelerated rate
- Identify short-life assets within real estate
- Segregate and reclassify qualified assets and report back with multiple assets and the tax class life
- Provide a more favorable tax position

Many times, the outcome of the study proves to be a significant multiple of the costs.

How We Do It

Working within IRS established guidelines, our dedicated tax professionals implement an integrated approach, which combines:

- In-depth knowledge of the construction process
- Application of the tax laws involving property classification for depreciation purposes
- Looking beyond the study itself to coordinate with any other accounting issues related to the project

Why Choose DHG

DHG has built a reputation with our clients for providing the highest level of service, completing 270+ successful cost segregation studies for dealerships nationwide. We are committed to providing individualized attention that integrates our construction project experience and tax law knowledge.
