Dealerships of all sizes are increasingly falling victim to cyber attacks and inadvertent security lapses, making cybersecurity a critical part of the business model. Failure to secure systems or address related regulatory requirements may lead to increasing regulatory scrutiny, negative impact to earnings and market value, and damage to your company's brand and reputation.

DHG Dealerships and IT Advisory collaborate to bring clients the credentials, industry knowledge and technical skills to help you identify cost-effective tools and processes to reduce cybersecurity risk within your dealership.

WHAT WE DO

Our team assesses information security and compliance activities embedded into your business model, so that your services and processes are secure, streamlined and efficient. Our offerings include:

+ Evaluate technical infrastructure and monitoring capabilities through:
  » Network and web application vulnerability assessments and penetration testing
  » Social engineering and physical site assessments
  » Information security risk assessment and program development

+ Assess your security preparedness and compliance with state, federal and industry frameworks, such as:
  » Payment Card Industry (PCI)
  » The FTC Act
  » The Dodd-Frank Act
  » Various marketing/advertising, credit-related, identity theft protection, aftermarket and product selling regulations

+ Assist with security incident and data breach response efforts through digital forensic evaluation, triage and guidance.

WHY CHOOSE DHG

DHG’s integrated Dealerships and IT Advisory team is knowledgeable in evolving security, privacy and regulatory compliance requirements in the dealership industry. Trust our advisors to facilitate your competitive success by providing comprehensive information security services tailored to your dealership’s specific needs.
