

**WHY CHOOSE DHG?**

DHG's professionals provide you with the benefits of both a national and regional firm: industry and subject matter professionals, a wide range of services and accessibility throughout the year.

## serving finance companies through a proven, risk-based approach by a dependable team

As regulators continue to scrutinize finance companies, the accounting function has propelled beyond a traditional role. Managing risk and compliance is a full-time endeavor for finance companies, which can impact growth objectives for the business. Consumer lending for automobiles, education, heavy equipment and other needs is important to the growth of our economy, and traditional loans are not a one-size-fits-all credit option.

**WHY CHOOSE DHG**

As a trusted advisor, DHG helps specialty finance companies manage a myriad of issues. Our experienced team understands the dynamic challenges you face and is dedicated to providing comprehensive assurance, tax and advisory services. Our resourceful professionals have significant industry experience and are active members in a number of associations, including the American Financial Services Association (AFSA).

We serve many specialty finance companies that are subsidiaries of our financial institution and insurance clients, as well as stand-alone specialty and small-loan consumer finance clients that offer title financing, sub-prime auto financing and leasing companies. DHG's professionals provide you with the benefits of both a national and regional firm: industry and subject matter professionals, a wide range of services and accessibility throughout the year.
