

WHY CHOOSE DHG?

The DHG IT Advisory team is knowledgeable in evolving security, privacy and regulatory compliance requirements in multiple industries, including healthcare, financial services, insurance, retail, business and consumer services, and software and technology.

tackling the cyber risk and compliance challenge

Companies of all sizes are increasingly falling victim to cyber attacks and inadvertent security lapses, making cybersecurity a critical part of the business model. In addition, rapidly evolving regulatory compliance requirements are increasing the complexity of performing transactions via the internet. Failure to secure systems or address regulatory requirements can lead to regulatory or industry fines and penalties, negatively impact earnings and market value, and damage a company's brand and reputation.

The DHG IT Advisory team brings the necessary credentials, deep industry knowledge of privacy laws and regulations, and technical skills to help you identify cost-effective tools and processes to reduce cybersecurity risk.

WHAT WE DO

Our team assesses information security and compliance activities embedded into your business model, so that your services and processes are secure, streamlined and efficient.

OUR OFFERINGS

Evaluate technical infrastructure and monitoring capabilities through:

- » Network and web application vulnerability assessments and penetration testing
- » Social engineering, physical site assessments and dark web research
- » Information security risk assessment and program assistance

Assess your security preparedness and compliance with evolving state, federal and industry regulations and frameworks, such as PCI, HIPAA / HITRUST, TR-39 and DFARS

Assist with security incident and data breach response efforts through digital forensic evaluation, triage and guidance for remediation
