

**WHY CHOOSE DHG?**

We will leverage our comprehensive knowledge and experience to provide a thorough investigation.

## resources to help navigate known &amp; unknown risks

DHG's Digital & Computer Forensics team includes highly qualified professionals with multidisciplinary technical knowledge and experience performing thorough digital forensics investigations.

**WHAT WE DO**

Our team has been trained in the latest forensics and evidence handling techniques, and we use the most sophisticated tools, including:

- |                     |   |  |
|---------------------|---|--|
| + EnCase            | + Passware                                      | + Cellebrite UFED Touch  |
| + Cellebrite        | + BlackLight                                    | + Purpose-built digital forensics labs with heightened security measures |
| + Physical Analyzer | + Tableau forensic duplicators & write blockers |  |
| + Forensic Tool Kit |   |  |

DHG evaluates electronically stored information (ESI) from sources that include, but are not limited to laptops, desktops and servers; mobile phones and tablets; USB drives and SD cards; email accounts; and Facebook, Twitter, and web-based email.

**WHY CHOOSE DHG**

DHG provides you with more than just the ESI we recover. We will leverage our comprehensive knowledge and experience to provide a thorough investigation. We work with our firm's forensics professionals to provide a dynamic, unified investigations team, eliminating the need to engage and coordinate forensic and financial professionals from multiple firms.
